Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Thomas A. Warden and Mary L. Fant. Shirley E. Brown and Traci C. Curry provide word processing and table formatting support. Editorial support is furnished by Jim Carlin, Research Information Branch, Information Division, Economics Management Staff. Data processing support is provided by Sharlan Starr and William Meiller, International Economic Systems Branch, Data Services Center.

Digest

First Decline in Exports Since 1986 (see p. 2) U.S. agricultural exports fell for the first time in 5 years during FY 1991, down \$2.7 billion to \$37.6 billion. Lower grain exports were responsible for much of the decline. Softer prices for wheat and a lower volume of corn exports reduced grain exports by \$3.5 billion. In contrast, high-value products continued to rise, reaching a record \$20.4 billion, exceeding bulk exports for virtually the first time.

FY 1991 Imports Level with Last Year (see p. 5) Agricultural imports for FY 1991 totaled \$22.6 billion, the same as last year. An increase in imports of competitive products to \$17.2 billion offset a reduction in noncompetitive imports, which totaled \$5.4 billion.

Credit Program Exports Stall in FY 1990 After 3-Year Climb (see p. 7) U.S. agricultural exports under the export credit guarantee programs of the Commodity Credit Corporation fell 15 percent in FY 1990 after a 29-percent increase in FY 1989, marking the end of a 3-year rise. Exports under these programs, valued at \$4.07 billion, represented almost 11 percent of the \$37.6 billion in total U.S. agricultural exports.

Index of Articles in 1991 (see p. 10) Articles published in Foreign Agricultural Trade of the United States during 1991 are listed, including topics such as bulk and high-value export trends, agricultural imports, the Market Promotion Program, export credit programs, and ocean freight rates for grain. Export shares of production, State export share estimates, and agricultural trade impacts on the economy were also covered.

First Decline in Exports Since 1986

U.S. agricultural exports fell for the first time in 5 years during FY 1991, down \$2.7 billion to \$37.6 billion. Lower grain exports were responsible for much of the decline. Softer prices for wheat and a lower volume of corn exports reduced grain exports by \$3.5 billion. In contrast, high-value products continued to rise, reaching a record \$20.4 billion, exceeding bulk exports for virtually the first time.

Wheat exports were \$1.4 billion lower in 1991, even though the volume of U.S. exports fell just 1 million tons to 27 million tons. Wheat prices fell during 1991 as world production rose to a record high, especially because two major importers harvested record or near-record crops. With little change in volume, lower prices sparked much of the \$1.4-billion loss in the value of U.S. wheat exports. During FY 1990, the average per-ton value of U.S. wheat exports reached \$150, compared with \$110 per ton 2 years earlier. Drought in the United States and other exporting producers drove prices higher in 1989 and 1990, but during 1991, with a recovery in production in the United States and elsewhere, prices fell. During FY 1991, the average per-ton value of U.S. wheat exports fell to \$107, a \$43-per-ton decline from the year before. China harvested a record 1990/91 crop and the Soviet Union's harvest was nearly a record. Yet, exports to China fell less than 200,000 tons to 3.7 million, despite China's record crop, and exports to the Soviet Union fell 1.3 million tons. Higher

exports to North Africa, the Philippines, and Brazil helped offset lower exports to China and the Soviet Union. U.S. feed grain exports also declined in price during FY 1991, but declining volume had a much larger impact on export value for feed grain than for wheat. In particular, feed grain shipments to the Soviet Union fell from a record 16.4 million tons to 9.1 million tons. Other markets where the United States lost feed grain sales included Korea, Mexico, Eastern Europe, Spain, Portugal, and Iraq.

High-Value Product (HVP) Exports Reach Record

U.S. HVP exports continued to grow during 1991, up \$1.5 billion to \$20.4 billion. Livestock product exports reached a record \$6.8 billion, and fruit, nut, and vegetable exports rose to a record \$6 billion.

Canada was the recipient of the largest gain in U.S. HVP exports, up \$752 million. But, much of this apparent growth reflected improved and more exacting reporting methods.

U.S. agricultural exports to Canada during October-December 1989 (first quarter of FY 1990) were undercounted by an estimated \$300-\$400 million. But October-December 1990 exports were reported correctly and the absence of under-reporting resulted in substantially higher reported exports. For further details on Canadian trade statistics, see Outlook for U.S. Agricultural Exports, May 30, 1990, p. 7. (Steve MacDonald, Commodity and Trade Analysis Branch, 202-219-0822)

FY 1991 Imports Level with Last Year

Agricultural imports for FY 1991 totaled \$22.6 billion, the same as last year. An increase in imports of competitive products to \$17.2 billion offset a reduction in noncompetitive imports, which totaled \$5.4 billion.

Beef and veal combined to be the largest imported commodity, valued at about \$2 billion for the year, a 10-percent increase from FY 1990. Coffee, at \$1.8 billion, was the second largest import even though its value fell 8 percent. The value of cocoa products was about \$1 billion, down 4 percent. Bananas and plantains also totaled about \$1 billion, up 7 percent.

Vegetable imports fell slightly in FY 1991 after increasing for 4 consecutive years. The major fresh vegetable imports, tomatoes and peppers, both declined, 32 percent and 12 percent, respectively. Onion imports, however, grew by 47 percent, making it the third largest vegetable import, surpassing cucumbers and potatoes. Among processed vegetable products, olives continued to be the major import. Processed tomatoes, including sauces and pastes, fell by 35 percent in value to \$90 million. Canned mushrooms rose 7 percent to \$123 million to replace processed tomatoes as the second largest imported processed vegetable. Fruit imports (including juices but excluding bananas) dropped after increasing continuously since 1987. Fresh fruits, however, rose about 10 percent. Grapes, while still the largest commodity in this group, fell 6 percent. Chile saw its share of grapes imported by the United States drop from 92 percent in FY 1990

to 78 percent in 1991. Most of its loss was picked up by Mexico, which increased its share from 7 percent to 21 percent over the year. Mexico remained the major supplier of melons, which rose 22 percent in value to \$144 million. Fresh citrus increased more than three times its FY 1990 level to \$70 million as Mexico supplied almost half and Spain a quarter. The domestic fresh citrus market was squeezed by the 1990 freeze in California, which provides most of the fresh supply, increasing demand for imported citrus.

Most of the decline in fruit imports was a result of decreased demand for foreign orange juice supplies, which fell 42 percent to \$287 million. Orange juice accounted for 31 percent of the value of all fruit imports during FY 1990, but dropped to 14 percent in FY 1991. Much of this decline was attributed to the comeback in Florida's orange crop, which produces most of the country's domestic orange juice.

Imports of horticultural products, such as seeds, cut flowers, and nursery stock, all showed modest gains. Most of the seeds came from Canada and Asia; cut flowers from South America, especially Colombia; and nursery stock, such as bulbs, from the Netherlands and Canada.

Tobacco imports were at their highest value since 1983, \$698 million, up 19 percent. Volume rose 11 percent to 215,000 metric tons. U.S. imports of unmanufactured tobacco have been growing over the past 20 years because the imports cost considerably less than domestic filler tobacco. (Susan Pollack, Commodity and Trade Analysis Branch, 202-219-0822)

Credit Program Exports Stall in FY 1990 After 3-Year Climb

U.S. agricultural exports under the export credit guarantee programs of the Commodity Credit Corporation (CCC) fell 15 percent in FY 1990 after a 29-percent increase in FY 1989, marking the end of a 3-year rise. Exports under these programs, valued at \$4.07 billion, represented almost 11 percent of the \$37.6 billion in total U.S. agricultural exports. An additional \$220 million of program exports was for wood products, cotton yarn, and leather, which are not considered agricultural exports.

The Food, Agriculture, Conservation, and Trade Act of 1990 reauthorizes the Short-Term Export Credit Guarantee Program (GSM-102), and the Intermediate-Term Export Credit Guarantee Program (GSM-103). The GSM-102 program guarantees repayment of credit of up to 3 years to finance export sales of privately owned stocks. The GSM-103 program allows up to 10 years' re-payment of loans that will benefit U.S. agricultural producers. Congressionally authorized levels for GSM-102 and GSM-103 were slightly modified in the 1990 farm bill. The 1990 Act makes available \$5 billion annually for the GSM-102 program, and establishes a ceiling of \$500 million per year for the GSM-103. The GSM-103 program is designed to help developing nations make the transition from concessional financing to cash purchases. In FY 1990, \$3.6 billion in agricultural commodities were exported to 25 countries under the GSM-102 program, and over \$450 million in guaranteed coverage on U.S. agricultural export sales to 11 different markets was provided under the GSM-103 program.

Several major importers of U.S. agricultural commodities participated in the programs. Mexico was the largest customer, accounting for more than 30 percent of the exports under these programs. Purchasers in Mexico imported nearly \$1.3 billion through GSM-102 and GSM-103. Primary commodities were corn (\$460 million), sorghum (\$236 million), and soybeans (\$202 million). Iraq was the second largest recipient of exports under these programs, importing about \$562 million of agricultural goods. However, this total was 40 percent lower than the level of FY 1989 as a result of the UN embargo of Iraq implemented in August

1990. Wheat (\$110 million), rice (\$108 million), and soybean meal (\$89 million) made up the bulk of Iraqi program imports and accounted for 14 percent of U.S. exports under CCC export credit programs. Algeria imported the third largest amount, accounting for 13 percent of the exports under these programs. Algeria imported \$530 million of agricultural products, mostly corn and wheat under GSM-102. These programs continue to play a significant role in the export of specific U.S. agricultural commodities, and major commodities exported under these programs were consistent with previous years. Wheat was once again the top commodity shipped under both CCC programs, with shipments valued at \$1.2 billion, about 29 percent of the export value of total U.S. wheat shipped in fiscal 1990. Under GSM-102, 27 percent of fiscal 1990 exports were wheat, with a value of \$956 million. Principal destinations under GSM-102 were Egypt, Korea, Algeria, and Pakistan, receiving 60 percent of wheat exports facilitated through the program. Under the GSM-103 program, 53 percent of total program exports were for wheat, 51 percent of which went to Morocco and Sri Lanka. Corn exports, valued at \$855 million, constituted the second largest commodity shipped under export credit guarantee programs and accounted for 12 percent of total FY 1990 corn exports. Mexico received almost 60 percent of GSM-102 corn exports. Mexico was also the largest importer of corn, valued at \$59 million, under the GSM-103 program. Mexico and Morocco accounted for 88 percent of GSM-103 corn exports.

Soybeans, valued at \$285 million, were the third largest commodity exported under the GSM-102. (No soybeans were exported under the GSM-103 program). More than 70 percent went to Mexico. Seven percent of total U.S. soybean exports were made under the GSM-102 program.

Barley (\$27 million) was the third largest commodity exported under the GSM-103 program, accounting for 6 percent of the program total. Algeria (\$12 million), Jordan (\$10 million), and Tunisia (\$5 million) were the only importers. The \$64 million exported under the GSM-102 and GSM-103 programs represented 29 percent of total U.S. barley exports during fiscal 1990. (Nydia R. Suarez and Linda C. Beeler, Commodity and Trade Analysis Branch, 202-219-0820)

--- = Not applicable.

1/ Based on exporters' reports to the Foreign Agricultural Service. Therefore, values may not completely reflect exports made under these programs. Preliminary.

2/ Excludes program exports not technically classified as agricultural products (logs, lumber, particle board, plywood, veneer, wood pulp, cotton yarn, and leather). GSM-102 totals for these nonagricultural commodities were \$252,683 in fiscal year 1989 and \$221,413 in fiscal year 1990.

3/ Columns may not add due to rounding.

Appendix Tables Appearing in Each Issue:

A-1--U.S. agricultural exports: Quantity and value by commodity
A-2--U.S. agricultural exports: Quantity, value, and unit value by commodity and country
A-3--U.S. wheat exports: Quantity (1,000 MT) by destination
A-4--U.S. coarse grains exports: Quantity (1,000 MT) by destination
A-5--U.S. soybean exports: Quantity (1,000 MT) by destination
A-6--U.S. agricultural exports: Value (1,000 dol) by destination

B-1--U.S. agricultural imports: Value (1,000 dol) by country of origin
B-2--U.S. agricultural imports: Quantity and value by commodity
B-3--U.S. agricultural imports: Quantity, value, and unit value by commodity and country

C-1--Foreign currency units per U.S. dollar
C-2--Domestic and foreign wheat prices
C-3--Corn, sorghum, rice, and cotton prices
C-4--U.S. and northern European soybean and product prices
C-5--U.S. import prices

Reports you can use . . . from ERS

U.S. Agricultural Trade Update

gives you up-to-the-minute information.

Each month the *U.S. Agricultural Trade Update* brings you ERS' most up-to-the-minute data on the farm trade sector. This useful 6-page update brings you the most current figures, *delivered by first-class mail to ensure timely delivery.*

The *U.S. Agricultural Trade Update* covers the monthly farm trade balance, U.S. farm imports and exports by quantity and value, and leading exports and exporters.

A 1-year subscription to the *U.S. Agricultural Trade Update* costs just \$15. Or save by ordering a 2-year subscription (that's 24 issues) for \$29, or a 3-year subscription for \$42.

Situation and Outlook Agricultural Trade Reports

give you the facts . . . and the forecasts!

These reports provide both current intelligence and historical data on international food and agricultural developments. They also forecast how changes in conditions and policies around the world will affect both U.S. and international agriculture.

Outlook for U.S. Agricultural Exports offers the latest value and volume of U.S. farm exports, by commodity and region, as well as the agricultural trade balance, import commodities, and export outlook. Subscription includes 4 issues. ***Agriculture and Trade*** reports summarize the year's developments affecting U.S. agriculture and trade in five key regions, and look to the future with articles on market trends, trade, and policy (subscription includes 5 regional reports: USSR, China, Western Europe, Pacific Rim, and Developing Economies).

The cost is just \$12 for a 1-year subscription per title. Or save by ordering a 2-year subscription for \$23, or a 3-year subscription for \$33.

World Agriculture

gives you the latest information on world markets.

This periodical gives you timely analysis and forecasts about how the world economy affects agricultural supply and demand. Emphasizes implications for global and U.S. agricultural trade.

The cost is just \$21 for a 1-year subscription. Or save by ordering a 2-year subscription for \$41, or a 3-year subscription for \$60.
